PROFESSIONAL SUMMARY

Full-stack and AI systems engineer applying medical-science rigour to architect low-latency LLM pipelines, scalable web portals, and resilient payment workflows. Proven record of deploying automated voting systems processing 50,000+ transactions, engineering RAG engines over specialized literature, and building game prototypes in C#/Unity.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C#, SQL, HTML5, CSS3
Backend & Cloud: Node.js, Express.js, PostgreSQL, Redis, REST APIs, Git, Render, Vercel
AI & LLM Systems: RAG Pipelines, LLM Orchestration, Vector Indexing, Prompt Engineering
Frontend & UI: React.js, Tailwind CSS, EJS Templates

TECHNICAL PROJECTS

Ranvier AI — Medical Study Copilot March 2026 – Present

- Architected a WhatsApp-accessible AI study copilot delivering textbook summaries, detailed medical explanations, and interactive multiple-choice drills for medical trainees.
- Built backend LLM inference pipelines and structured RAG context retrieval over medical textbooks, incorporating a Redis caching layer to maintain sub-second response latency.
- Implemented payload structure optimizations to lower token expenditure while ensuring low-latency query handling.

NIMSA Regional Web Portal & Automated Voting Engine Aug 2026 – Sept 2026

- Engineered the official regional web portal for the Nigerian Medical Students' Association South East Region across 19 university chapters.
- Integrated Paystack payment gateways to automate member verification, dues collection, and real-time live election leaderboards.
- Executed high-volume concurrency handling that processed 50,000+ verified votes with zero transaction drop-off during live regional elections.

Interactive 3D Game Prototypes (C# / Unity)

- Programmed three 3D game prototypes in Unity, writing custom C# scripts for character controllers, state machines, combat mechanics, and physics systems.
- Managed scene organization, input mapping, and event-driven game logic using Git version control for code iteration.

LEADERSHIP & EXPERIENCE

Director of ICT | Nigerian Medical Students' Association (NIMSA) South East Jan 2026 – Present

- Oversee digital infrastructure and technical roadmap execution for 19 medical student chapters across southeastern Nigeria.
- Designed and maintained centralized member databases, automated dues portals, and regional web utilities.

Director of Entrepreneurship | COOUMSA Aug 2026 – Present

- Conceptualized and directed the commercial rollout and merchant onboarding for the COOUMSA Business Hub to centralize student trade and protect buyers from fraud.

EDUCATION

MBBS (Medicine and Surgery) — Chukwuemeka Odumegwu Ojukwu University (COOU) In Progress, 400 Level
